## Overall
- Most people tend to plan group events on a somewhat frequent basis
- Most events occur only on a single day

Design Comments
- Most people checked outgoing rather than incoming balance, perhaps change the location of these items
- Overall those who had seen the app before said it was an improvement from the first draft
- Make the view/edit events page accessible from the eventi logo
- Make plus sign for add activity bigger on PC version

Edits
- Logo returns you to the home page
- Incoming balance is listed before outgoing balance
- Added an FAQ page since users seemed to be confused about the difference between events and activities, FAQ is accessible from the header

Frequently Asked Questions

What's the difference between an event and an activity? ⌃

An event is an occurrence that can happen on a single day or occur over multiple days. It's created through clicking the "create event" button on the bottom left. Once an event is created, users can add activities to an event. Think of activities as items on your itinerary. An event is a broad overview of the occurrence while activities are more detailed
